

BridgeGate International

BridgeGate International provides robust integration solutions that quickly connect the many disparate applications and technologies that exist in healthcare and government organizations. Our any-to-any system integration solution reduces the length and complexity of integration projects, and enables legacy systems to be incrementally upgraded, so that existing investments are protected, while shifting busy IT staff to other important tasks.

Fast Facts

- Founded in 1999, privately-held and headquartered in Jacksonville, Florida
- Over the past 10 years, the BridgeGate solution has facilitated tens of millions of transactions globally, with implementations in the United States, Europe and Asia
- Backed by investors that include San Diego-based MedImpact Healthcare Systems, one of the nation's largest pharmacy benefit management (PBM) companies, currently serving 32 million individuals nationwide
- BridgeGate is a leader in helping companies follow all major industry and communication standards. Changes to industry standards, such as HIPAA, are automatically applied and multiple versions of standards can be maintained to accommodate all business partners.

BridgeGate Solution

At BridgeGate we make the complex simple. BridgeGate quickly integrates disparate operational, financial and e-commerce systems within healthcare and government enterprises. To its integration solution, BridgeGate adds a management dashboard layer that organizes raw data and gives teams at-a-glance information required to make quicker, better decisions. At the click of a button, any data that was integrated using the BridgeGate platform can quickly be consolidated into a dashboard report for analysis and exception management so team members can see how their department is contributing to the greater whole. BridgeGate integrates NOW, and turns data from any source into meaningful decisions that have impact within your organization.
